

Hell Wath Grassland Works

We have been working on improving the grasslands at Hell Wath over the last couple of years. Namely by cutting and removing the grass and by some scrub management.

Towards the end of October we will have a contractor on site to cut and collect the grasslands.

While the works are going on we ask that you keep your **dog on a lead** to help the contractor. See the map above for the areas that will be cleared.

This grassland management will be complementary to the future scrub clearance that we will look to do this coming winter, with volunteers.
